<b>7</b>	<b>Code-lines</b>	<b>2</b>
<b>8</b>	<b>Notes</b>	<b>2</b>
<b>9</b>	<b>The Bibliography</b>	<b>2</b>

# 1 Introduction

The following document is designed as a Template for LaTeX by Sascha Bilert. I tried to implement my most frequently used latex packages. If you have any comments please contact my under:

sascha.bilert@student.jade-hs.de

I many cases you need to add different \use-packages to format your Latex document for your own purpose. My goal was to build a bridge between the packages and the usage for my colleges. Also i wanted to work with a git repository as a version control system for my Latex document.

So on one hand its a training for my Latex skills and on the other hand every can have a lot and maybe find some interesting aspects. I also like to mention, that i hate those **blue** and **red** messages in the LOG FILE!

I usually work with **texmaker** but as you know, there a many different typesetting programmes for Latex. The latest i tried to work with is the vim editor with a Latex compiler.

## 2 Section

Here you can see different sections and subsections to arrange your information and you can have some fun with numerics or alphabetics

### 2.1 First Subsection

### 2.2 Second Subsection

#### 2.2.1 First Sub-Subsection

#### 2.2.2 Second Sub-Subsection

## 3 Using Macros

## 4 Bullets and enumerations

In the following section i what to say something about bullet-lists and enumerations. I don't us both very often, but in some cases its clever to know how you work with them.

- First Item
- Second Item
  - First sub-item
  - Second sub-item

1. First statement

2. Second statement

- (a) First sub-statement
- (b) Second sub-statement

## 5 Mathematics

## 6 Figures

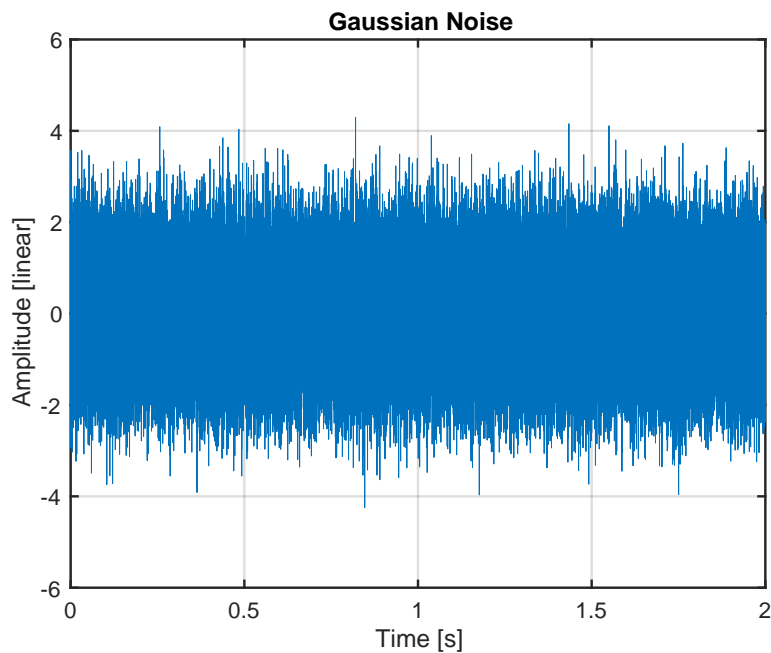

Figure 1: Gaussian noise with  $f_s = 48$  kHz

## 7 Code-lines

## 8 Notes

## 9 The Bibliography

This is how you do citation in LaTeX using different styles [HFVK10] and here is another Book [Yos13] and some more articles [VDK91]. We also have some in-collections [BS01].
